These adjusters are direct replacements for micrometers used on OptoSigma stages. The knob-less design saves space and prevents inadvertent operation.

- The screw bushing can be lock with the clamp screw.
- The flat-type tip is compatible with OptoSigma manual stages and holders.
- The knobbed KCL hex wrench or other customer supplied hex wrench can be used.

Guide

▶ These FPSA can be purchased preassembled onto a stage. Please contact our Sales Division for more information.

Attention

▶ The flat type-tip works best against spheres and the R-Type works best pushing against flats.
