

Model: A9

Types: Single core quartz optical fibers

Size: 64(W)*82(D)*60(H)mm

Weight: about 332G

Average angle: 0.5°

PLaced: 3-1 in multi - function fixture

Blade life: 48000 times

One side of the blade: 16 sides

Scale use: 1000s, each scale can be

adjusted 3 times height

Cleave length: 5mm—20mm

Types: 0.25—1mm , tail fibers, leather cables

Core: Single core

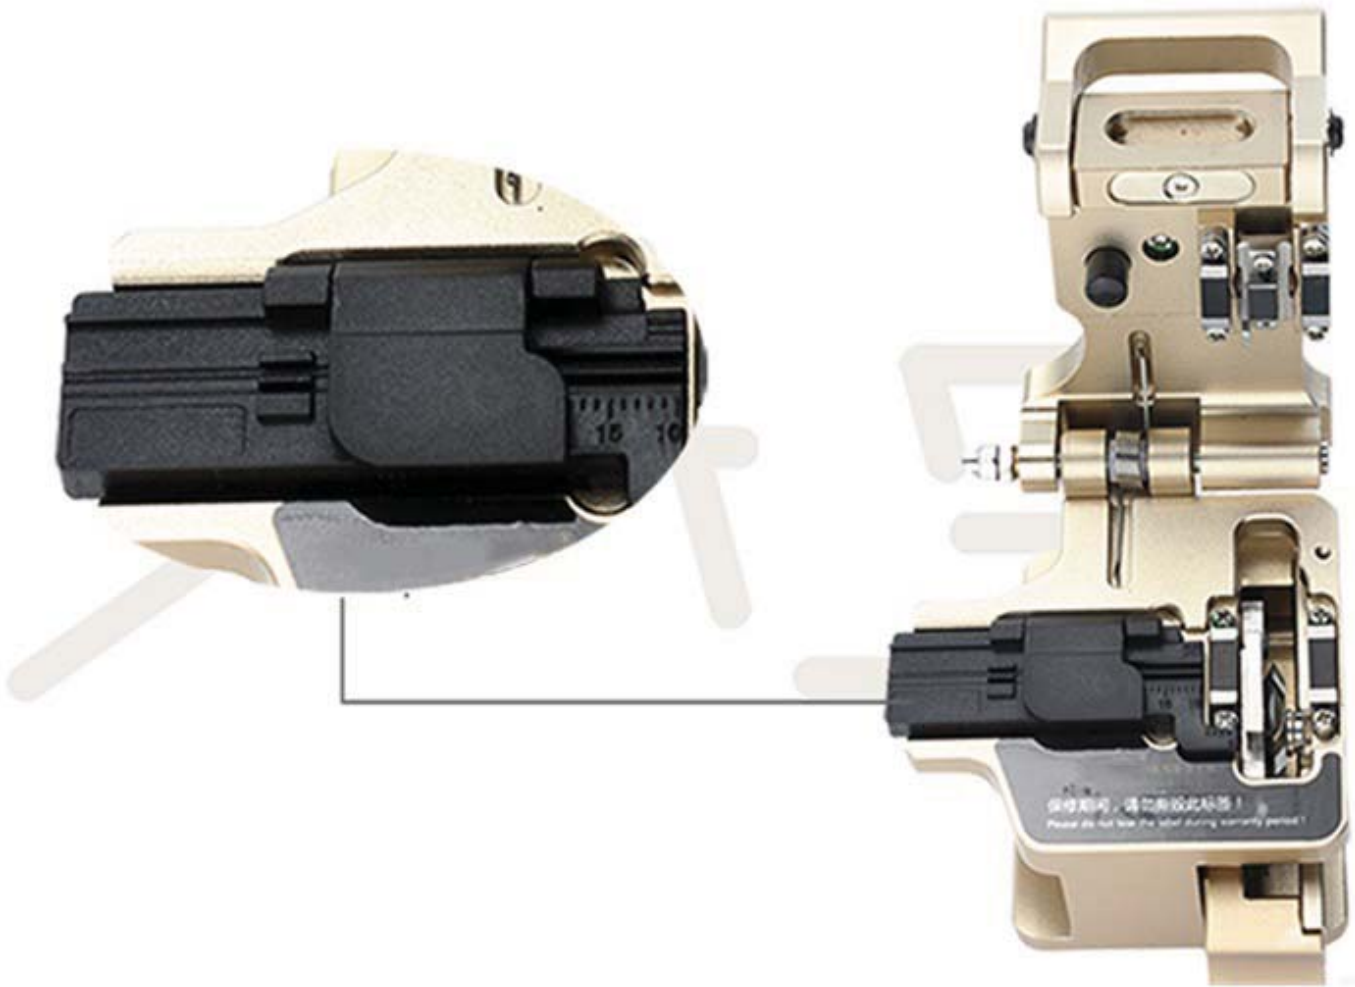

Steps: 2

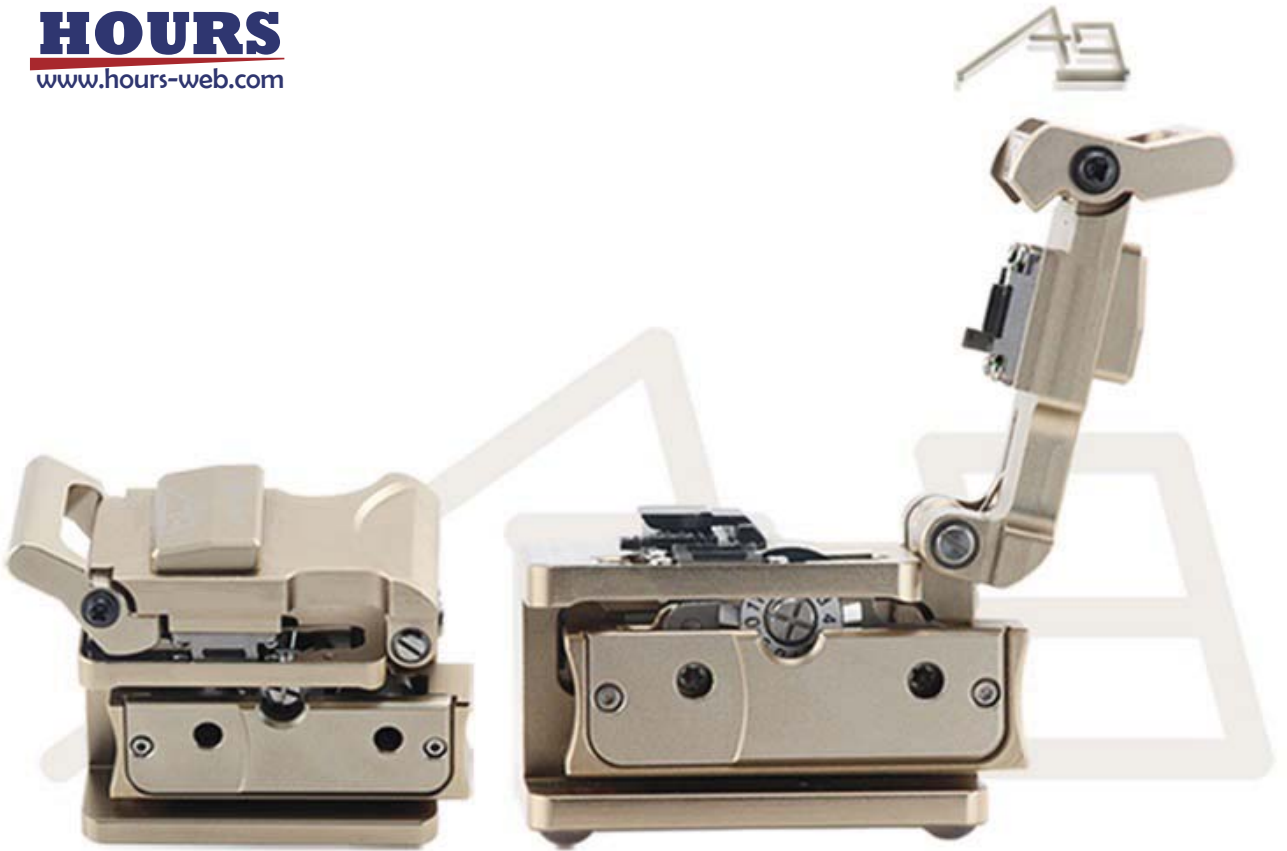

fiber cleaver A9
Precision and durable

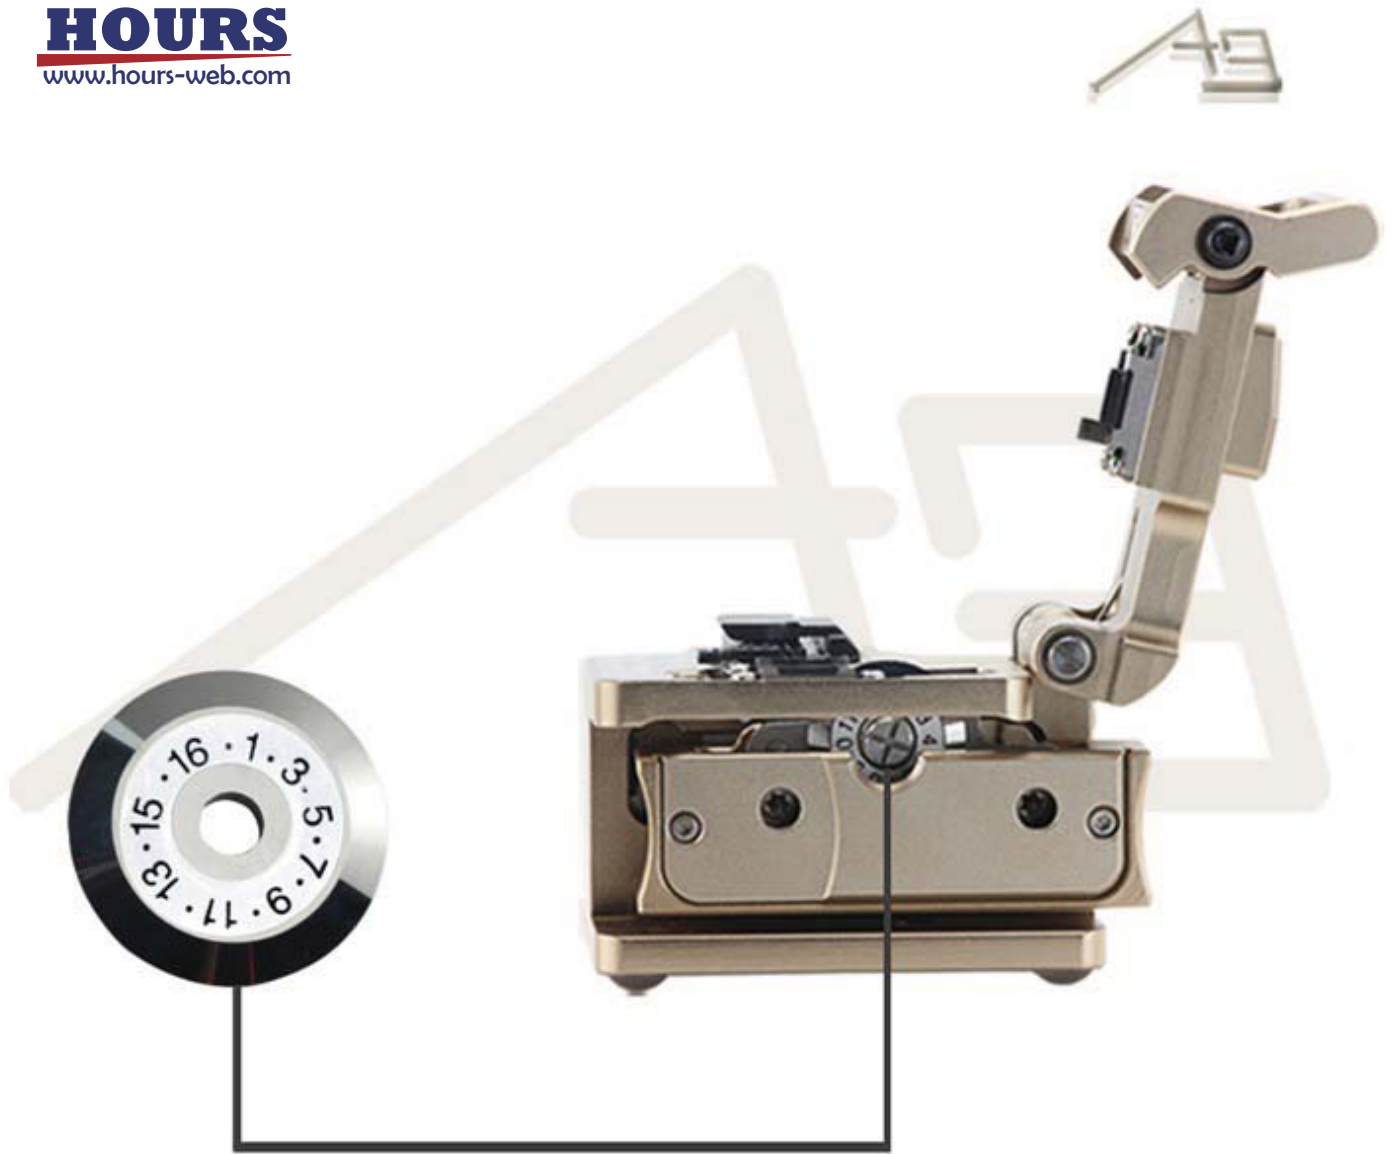

The fiber cleaver A9 adopts advanced aluminum alloy material and has high hardness , high precision performance, can be widely used in various construction occasions.

Multi-functional three-in-one fixture,
elastic and not easy to fall.

Stable cleaving angle, smooth cleaving end surface,
manual cleaving, automatic reset after cleaving.

Imported tungsten steel blade
that can cleaving 48000 times.

Ingenious design of presser foot, lined with elastic sponge pads, without having to adjust the blade after height drop, it can still normal use with super shockproof function .

With Anti-breakage technology ,no longer disconnect the optical fiber when it is in the cold weather .

Product configurations

Equipped with shockproof and anti-fail hard bag,
it is more convenient to carry.
