

Provides spot lighting using original converging technology

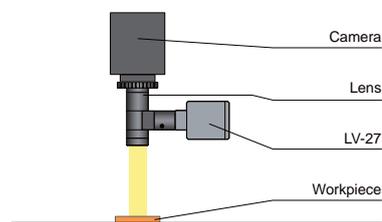

Applications

As a light source for a telecentric lens, light source for inspecting alignment of LCDs or circuit boards, light source for dimension measuring, light source for spot illumination, etc.

Features

Spot Light with tip radius of $\varnothing 8$ mm and emitting surface of $\varnothing 6$ mm. Can be used embedded into the coaxial illuminating section of a telecentric lens or macro lens.

Example configuration (LV-27)

Lightweight, compact design

With its lightweight and compact design, it doesn't take up much room and is perfect for saving space.

Spot Light with low power consumption

The LV series consumes 0.8 W (for red) of power, and can be used for saving energy.

We accept custom orders. Please feel free to inquire.
