

Adjustable Cylindrical Lens Holders

ACLH

Holders for square lenses (cylindrical lenses).

Easy to fix square lenses of any size with its sliding system.

- ▶ Space saving sliding clamp allows optics to be placed in close proximity. The standard type has a cork sheet bonded to the top and bottom of lens clamping sections to prevent lenses slipping.
- ▶ The flexible type clamps lenses from the front and back with the lens fix frames and lens frames attached to the top and bottom sections in order to fix thick lenses and prevent lenses falling off.

Guide

- ▶ Post length can be changed. If the length of post is specified at the time of purchase, this product will be delivered after replacing posts.
- ▶ Post replacement is gratis, but contact our International Sales Division because there may be extra charges due to differences in length.

Attention

- ▶ When using the standard type, make sure to tighten the slide clamps before tightening the lens clamp.
- ▶ When using the standard type, gently tighten the lens clamp to prevent stressing the lens.
- ▶ Not recommended for round lenses. Use ARLH [Reference](#) D029
