

Polarizing Beamsplitters | PB

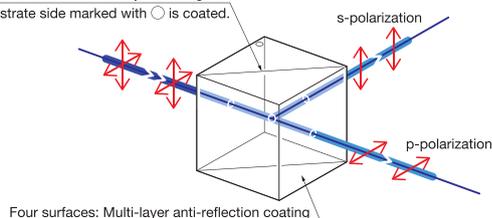

Polarizing beamsplitters consist of two right angle prisms. One of them is coated with dielectric multi-layer polarizing coating on the hypotenuse face. Polarizing beamsplitters split monochromatic beam entering at zero degree into p-polarization as transmitted and s-polarization as reflected.

- Four surfaces of the cube are coated with narrowband multi-layer anti-reflection coatings.
- The losses of input beam of these products are minimized because of no absorption of dielectric coating.
- For cube beamsplitters, unlike plate beamsplitters, beam deviations of transmitted beams and ghosts rarely occur.

Schematic

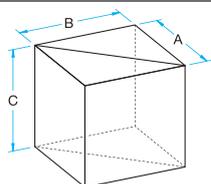

Hypotenuse: Dielectric multi-layer coating
 * The substrate side marked with ○ is coated.

Four surfaces: Multi-layer anti-reflection coating

(in mm)

●Tolerance
 Length A·B±0.2
 Height C±0.1

Specifications

Material	BK7
Surface flatness of substrate	$\lambda/4$
Angular deviation of transmitted beam	$<10'$
Coating	Hypotenuse Surface: Dielectric multi-layer polarizing coating Four Surfaces: Narrowband multi-layer anti-reflection coating
Incident angle	0°
transmittance of P polarized light	$>97\%$ (405nm: $>90\%$)
transmittance of S polarized light	$>98\%$ (405nm, 1064nm, 1300nm, 1550nm: $>97\%$)
Extinction ratio of transmission	Ts : Tp = 1 : 1000
Laser Damage Threshold	0.3J/cm ² (Laser pulse with 10ns, repetition frequency 20Hz)
Surface Quality (Scratch-Dig)	20-10
Clear aperture	Circle inscribed in a square of 85% of the dimensions

Guide

- ▶ Please contact our International Sales Division for customized products. (Customized on size, wavelength etc.)
- ▶ Plate-type of Polarizing Beamsplitters (PB-C) is also available upon your request. [Reference](#) C068
- ▶ There is also a high extinction ratio Glan-Thompson prism (GTPB/ PPH). [Reference](#) C087

Attention

- ▶ Input beam from the prism on the side indicated by ○. When the light is incident from the side of the prism without mark, there is a possibility that the characteristics of the transmittance and extinction ratio changes.
- ▶ The transmittance curves are based on actual measurements and might be different with manufacturing lots.
- ▶ The surface flatness is the reflected wavefront distortion of the surface before coating.
- ▶ Be sure to wear laser safety goggles when checking optical path and adjusting optical axis.
